DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, 14-41, drawn to a solid jewelry wire item, classified in class 59, subclass 80.
 - II. Claims 7-13, drawn to a method of making a solid tubular gold jewelry wire item, classified in class 29, subclass 896.1.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case The product as claimed can be made by a materially different process not requiring the particulars of the claimed method. Further, reference is made to MPEP 806.05 (f) where the product defined by the process is a product claim and as long as another materially different process exist, restriction is proper.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

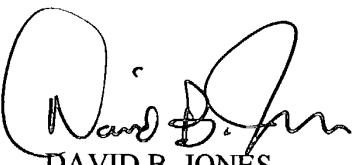

Art Unit: 3725

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
